Mike Dies is a great platforming game that should get more attention! Even though there are some bugs here and there, it has good voice acting, a great story, great level design, good art design and had challenging level design. I really hopes it comes to more platforms in the future because there is some good potential there.. space Moth dx is shumup, the checkpoints are awesome and it looks amazing giving you the idea that you really are a bug in the forest, I liked a lot the artwork they made for the unused parts of the screen, its very arcade style, I just found out that you can grab the enemy drops using the "shift" key, and it also do a lazer blast, the game tries to protect your lives auto using bombs when you are hit, its a optional feature.

+amazing soundtrack

+pickup and play

+no loading screens

+great interface

10/10. Fun mini-game for the chilled evening.

The mouse controls simulate the feeling of playing real tabletop football very well. The multiplayer modus against a friend is really addictive and just faced major network improvements. It's a good sign to see the developer constantly polishing his product, so a well-rounded foosball experience can be expected.. Every time when i was in the race, error_01 appeared on my screen, and forced me back to the menu.

Advise to people who want to buy this game: Don't buy it until they fix this problem, or just buy Forza Horizon 4.. It's like Doom has been ported to a ZX Spectrum, made easier and less engaging.

You can control by mouse and using WASD.

It's a nice style, but after playing for less than half an hour, being cornered by some kind of floating things and being sent back to the start (I didn't save), I can't say I'm biting at the chain to have another go.

If you like your FPS to be based in the past, bewildering and cheap, then this might be the game for you. Then again, it might not.

Note, the game would crash if I didn't press ESC past the story line text quite rapidly. People say it was really hard and difficult but I finished the entire game in a mere half an hour. Too easy, good thing I bought the bundle for \$4 only..

Q49PQ-7TDMV-GR4V4 - Enjoy. At least one of you. REALLY enjoying playing this physics puzzler. The concept is to simply reach the exit door using the available objects, buttons & switches in each level. Not too difficult to solve- tho I'm only on level 6/30 & expect the difficulty to increase... Simple but effective 3D graphics here. And the same price as a bar of chocolate. RECOMMENDED for puzzlers.. Cool game and all though, Playing against players with silenced gear is no fun, Information is limited where Silenced players usually leave no trace if you were camera was not the specific place you were getting shot from,

Will be taking my money back for now, Might buy the game in the future,

Suggestions:

With the small community playing the game, At least set some balancing in terms of equipment,

I just started the game played through some campaign missions then played multiplayer matches where I was matched up with silvers who had full silenced gear. Feels like the enemy is hacking when he can get his/her soldiers behind my lines in 2 turns,

I feel the DLC is overpriced but the kayak update brought me back to the game.. This game has a certain charm to it, although it does need a lot of work. If you like games like Harvest Moon it gives off a similar feeling. After this game is fully developed I feel as if it would be an amazing game.. This is a great software for playing games, it's easy to use, simple interface, online manual is informative and the community support for this software is vast. It is a very big help to those that want to start doing Let's Plays or even reviews. For recording all those little moments in games that you know you talk about but want to share but don't have the tools to do so. It is also way more lightweight than FRAPS, and much more stable and affordable to boot, for the features it gives for the price.

It is also good to try and get it on sale, if you can, got it in the Summer sale, was worth every penny, and if I had the funds at the time to do so, I'd have paid full price. More or less this is a good system to use with steam, the Steam notifications are also need to be turned off, and I wish there was a way to do it now with this new version, the steam overlay can't be seen in this software, but a small gripe in an otherwise wonderful program. I can't recommend this enough.. Picture the scene:

Mide vs Strat Clut [Me]

Three thousand Irishmen, led by their King, assaulting my coastal town on the East coast of Ireland. My steadfast garrison, led by their commander Nud. Carnage.

A shield castle across the gateway, my retinue swordsmen hack through the enemy, my longbowmen firing arrow after arrow, boiling oil pouring onto my enemy.

Love the time period, love the units, love the factions

9V10. Look, the game is far from great. It has a few bugs including a crash issue, it could use some work in the graphics department with the backgrounds especially looking very bland, and it totally lacks any sound effects which causes a distinct lack of feedback.

However, the game has heart and a very interesting mechanic whereby you control the leviathan (aircraft) with your keyboard like any other shmup (Shoot'em up) while simultaneously controlling the starblade (onboard turret thing) with the mouse. The game needs a way more polish but the current gameplay is engaging.

If you are a fan of these types of shooters, this isn't a bad way to spend \$4 (currently 2.99 on sale). I'll recommend it, with the hope that the developer will update the game because it really has a chance to be pretty good

<https://www.youtube.com/watch?v=s1MPSmdQL8w>. It's free content that adds more variety of weapons and skills, there are literally no downsides.. Similar to "Solitaire Christmas Match 2 Cards", but with mahjong instead of card matching. And with the same music that I liked so much, perfect for holiday gameplay! Only con is the hint that kicks in if you haven't made a move in some short amount of time; it makes me feel kinda rushed. Tip: The puzzle is solved when you match all of the *gold* tiles. At first I was trying to clear the board every time, but kept taking too many moves for the level goal. And then I thought, hey, the goal is impossible for that number of tiles; the number of moves must be half the number of tiles. So I read the directions more carefully. Ah... half the number of *gold* tiles.
